

Putting the power back in the hands of the mission.

Falls Technology delivers innovative, mission-critical software and AI solutions, empowering federal government, defense, and national-security missions.

WHO WE ARE

Falls Technology delivers end-to-end software development and IT solutions tailored to mission-critical needs. Our team of subject matter experts and early-career professionals excels in high-impact roles (software developers, systems engineers, architects, and tech leads), driving success through innovation and technical excellence.

WHY CHOOSE FALLS

Mission-focused expertise.

Deep experience across federal and defense domains ensures tailored, high-impact solutions for your mission-critical challenges.

Dynamic, talented team.

A mix of seasoned SMEs and cleared, early-career professionals fosters innovation and agility, sourced through trusted internal referrals and college recruiting.

- Security Engineering
- Architecture

CORE SERVICES

- Custom mission-critical solutions
- API and system interoperability
- COTS integration
- Human-centered UI/UX design
- Platform adoption training
- Automated operational efficiency systems
- Scalable critical infrastructure design
- ATO compliance and certification support
- Custom Salesforce mission solutions
- Data visualization for better decision-making

BUILD WITH AI

AI-assisted engineering: LLMs in the development environment to write, refactor, review, and troubleshoot code; prototyped self-hosted, offline LLM code review in controlled environments.

Document intelligence: OCR and ETL pipelines with AI to classify and route records, cross-model auditing, and human-in-the-loop review.

Trusted AI: people in the loop on consequential decisions; cross-checking model outputs; self-hosted models on controlled networks.

HOW WE DELIVER — PROVE · DELIVER · SCALE

Prove: prototype first and earn user buy-in. Deliver: mission-first MVP, then improve with real users. Scale: automated, secure operations and architecture that grow without rework.
